## WORK EXPERIENCE

Jan 2023 - Present

### Freelance Software Developer (Remote)

- Design a website for an NGO called Radical Flexibility, in order to accept donations and sell paintings for charity to help victims of disasters overseas, using Stripe as the payment processor.
- Supabase as a platform, NextJS 13 w/ Typescript with a PostgreSQL DBMS

Jul 2022 – Dec 2022

### Full-Stack Developer | Diam International, Hauppauge, NY

- Maintained and improved in-house website that managed logistics and employees.
- Utilized Laravel 8 as a back-end API, and Nuxt for SSR front end logic; created a portal for external customers to access internal recycling numbers.
- Developed experience using VCS, DevOps to deploy updates in a small team.
- Handled external server issues to ensure website uptime was maintained 100%

Jan 2022 – Jan 2023

### Web Developer Intern | Cowan Consulting, Inc. Brooklyn, NY (remote)

- Created a proprietary Real Estate web-application using Firebase as a host, and React.js to create a single-entry point to the virtual DOM.
- Used React to create web components using hooks to connect with a database; used CRUD operations to manage data within the application and store within Google Firestore, along with other Google Cloud services.
- Trained eight short-term interns on React concepts over the course of one year.
